FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2022

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 000-50039

OLD DOMINION ELECTRIC COOPERATIVE

(Exact name of registrant as specified in its charter)

VIRGINIA

(State or other jurisdiction of
incorporation or organization)

23-7048405

(I.R.S. employer
identification no.)

4201 Dominion Boulevard, Glen Allen, Virginia

(Address of principal executive offices)

23060

(Zip code)

(804) 747-0592

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act: NONE

Securities registered pursuant to Section 12(g) of the Act: NONE

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Securities registered pursuant to Section 12(b) of the Act: NONE

The Registrant is a membership corporation and has no authorized or outstanding equity securities.

GLOSSARY OF TERMS

The following abbreviations or acronyms used in this Form 10-Q are defined below:

<u>Abbreviation or Acronym</u>	<u>Definition</u>
ACES	Alliance for Cooperative Energy Services Power Marketing, LLC
ASU	Accounting Standards Update
Clover	Clover Power Station
FASB	Financial Accounting Standards Board
FERC	Federal Energy Regulatory Commission
GAAP	Accounting principles generally accepted in the United States
Louisa	Louisa Power Station
Marsh Run	Marsh Run Power Station
MMBTU	One Million British Thermal Units
MWh	Megawatt hour(s)
North Anna	North Anna Nuclear Power Station
NYMEX	New York Mercantile Exchange
ODEC, We, Our, Us	Old Dominion Electric Cooperative
PJM	PJM Interconnection, LLC
TEC	TEC Trading, Inc.
Wildcat Point	Wildcat Point Generation Facility
XBRL	Extensible Business Reporting Language

OLD DOMINION ELECTRIC COOPERATIVE

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. *General*

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments, which include only normal recurring adjustments, necessary for a fair statement of our consolidated financial position as of March 31, 2022, our consolidated results of operations for the three months ended March 31, 2022 and 2021, and cash flows for the three months ended March 31, 2022 and 2021. The consolidated results of operations for the three months ended March 31, 2022, are not necessarily indicative of the results to be expected for the entire year. These financial statements should be read in conjunction with the financial statements and notes thereto included in our 2021 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

The accompanying financial statements reflect the consolidated accounts of Old Dominion Electric Cooperative and TEC. We are a not-for-profit wholesale power supply cooperative, incorporated under the laws of the Commonwealth of Virginia in 1948. We have two classes of members. Our eleven Class A members are customer-owned electric distribution cooperatives engaged in the retail sale of power to member customers located in Virginia, Delaware, and Maryland. Our sole Class B member is TEC, a taxable corporation owned by our member distribution cooperatives. Our board of directors is composed of two representatives from each of the member distribution cooperatives and one representative from TEC. In accordance with Consolidation Accounting, TEC is considered a variable interest entity for which we are the primary beneficiary. We have eliminated all intercompany balances and transactions in consolidation. The assets and liabilities and non-controlling interest of TEC are recorded at carrying value and the consolidated assets were \$5.8 million as of March 31, 2022 and December 31, 2021. The income taxes reported on our Condensed Consolidated Statements of Revenues, Expenses, and Patronage Capital relate to the tax provision for TEC. As TEC is wholly-owned by our Class A members, its equity is presented as a non-controlling interest in our consolidated financial statements.

Our rates are set periodically by a formula that was accepted for filing by FERC and are not regulated by the public service commissions of the states in which our member distribution cooperatives operate.

We comply with the Uniform System of Accounts as prescribed by FERC. In conformity with GAAP, the accounting policies and practices applied by us in the determination of rates are also employed for financial reporting purposes. The preparation of our condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported therein. Actual results could differ from those estimates. We did not have any other comprehensive income for the periods presented.

We are continuing to monitor ways in which the ongoing impact of the COVID-19 pandemic could affect our operations, results of operations, financial condition, and cash flows.

2. *Fair Value Measurements*

The fair value hierarchy gives the highest priority to quoted prices in active markets (Level 1) and the lowest priority to unobservable data (Level 3). In some cases, the inputs used to measure fair value might fall in different levels of the fair value hierarchy. The lowest level input that is significant to a fair value measurement in its entirety determines the applicable level in the fair value hierarchy. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The following tables summarize our financial assets and liabilities measured at fair value on a recurring basis as of March 31, 2022 and December 31, 2021:

	March 31, 2022	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(in thousands)		
Nuclear decommissioning trust ⁽¹⁾	\$ 82,270	\$ 82,270	\$ —	\$ —
Nuclear decommissioning trust - net asset value ⁽¹⁾⁽²⁾	174,590	—	—	—
Unrestricted investments and other ⁽³⁾	232	—	232	—
Derivatives - gas and power ⁽⁴⁾	113,780	94,293	11,013	8,474
Total Financial Assets	\$ 370,872	\$ 176,563	\$ 11,245	\$ 8,474
Derivatives - gas and power ⁽⁴⁾	\$ 1,801	\$ —	\$ 1,801	\$ —
Total Financial Liabilities	\$ 1,801	\$ —	\$ 1,801	\$ —

	December 31, 2021	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(in thousands)		
Nuclear decommissioning trust ⁽¹⁾	\$ 89,227	\$ 89,227	\$ —	\$ —
Nuclear decommissioning trust - net asset value ⁽¹⁾⁽²⁾	187,431	—	—	—
Unrestricted investments and other ⁽³⁾	212	—	212	—
Derivatives - gas and power ⁽⁴⁾	50,793	32,078	3,705	15,010
Total Financial Assets	\$ 327,663	\$ 121,305	\$ 3,917	\$ 15,010
Derivatives - gas and power ⁽⁴⁾	\$ 4,291	\$ —	\$ 4,291	\$ —
Total Financial Liabilities	\$ 4,291	\$ —	\$ 4,291	\$ —

⁽¹⁾ For additional information about our nuclear decommissioning trust, see Note 4—Investments below.

⁽²⁾ Nuclear decommissioning trust includes investments measured at net asset value per share (or its equivalent) as a practical expedient and these investments have not been categorized in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in our Condensed Consolidated Balance Sheet.

⁽³⁾ Unrestricted investments and other includes investments that are related to equity securities.

⁽⁴⁾ Derivatives - gas and power represent natural gas futures contracts (Level 1 and Level 2) and financial transmission rights (Level 3). Level 1 are indexed against NYMEX. Level 2 are valued by ACES using observable market inputs for similar transactions. Level 3 are valued by ACES using unobservable market inputs, including situations where there is little market activity. Sensitivity in the market price of financial transmission rights could impact the fair value. For additional information about our derivative financial instruments, see Note 1 of the Notes to Consolidated Financial Statements in our 2021 Annual Report on Form 10-K.

3. Derivatives and Hedging

We are exposed to market price risk by purchasing power to supply the power requirements of our member distribution cooperatives that are not met by our owned generation. In addition, the purchase of fuel to operate our generating facilities also exposes us to market price risk. To manage this exposure, we utilize derivative instruments. See Note 1 of the Notes to Consolidated Financial Statements in our 2021 Annual Report on Form 10-K.

Changes in the fair value of our derivative instruments accounted for at fair value are recorded as a regulatory asset or regulatory liability. The change in these accounts is included in the operating activities section of our Condensed Consolidated Statements of Cash Flows.

Outstanding derivative instruments, excluding contracts accounted for as normal purchase/normal sale, were as follows:

Commodity	Unit of Measure	Quantity	
		As of March 31, 2022	As of December 31, 2021
Natural gas	MMBTU	62,260,000	58,640,000
Purchased power - financial transmission rights	MWh	6,256,711	9,156,789

The fair value of our derivative instruments, excluding contracts accounted for as normal purchase/normal sale, was as follows:

	Balance Sheet Location	Fair Value	
		As of March 31, 2022	As of December 31, 2021
(in thousands)			
Derivatives in an asset position:			
Natural gas futures contracts	Other assets	\$ 105,306	\$ 35,783
Financial transmission rights	Other assets	8,474	15,010
Total derivatives in an asset position		<u>\$ 113,780</u>	<u>\$ 50,793</u>
Derivatives in a liability position:			
Natural gas futures contracts	Other liabilities	\$ 1,801	\$ 4,291
Total derivatives in a liability position		<u>\$ 1,801</u>	<u>\$ 4,291</u>

The Effect of Derivative Instruments on the Condensed Consolidated Statements of Revenues, Expenses, and Patronage Capital for the Three Months Ended March 31, 2022 and 2021

Derivatives Accounted for Utilizing Regulatory Accounting	Amount of Gain (Loss) Recognized in Regulatory Asset/Liability for Derivatives as of March 31,		Location of Gain (Loss) Reclassified from Regulatory Asset/Liability into Income	Amount of Gain (Loss) Reclassified from Regulatory Asset/Liability into Income for the Three Months Ended March 31,	
	2022	2021		2022	2021
	(in thousands)			(in thousands)	
Natural gas futures contracts	\$ 116,238	\$ 3,711	Fuel	\$ 20,422	\$ (4,365)
Purchased power	8,474	88	Purchased power	1,931	3,612
Total	\$ 124,712	\$ 3,799		\$ 22,353	\$ (753)

Our hedging activities expose us to credit-related risks. We use hedging instruments, including forwards, futures, financial transmission rights, and options, to mitigate our power market price risks. Because we rely substantially on the use of hedging instruments, we are exposed to the risk that counterparties will default in performance of their obligations to us. Although we assess the creditworthiness of counterparties and other credit issues related to these hedging instruments, and we may require our counterparties to post collateral with us, defaults may still occur. Defaults may take the form of failure to physically deliver purchased energy or failure to pay. If a default occurs, we may be forced to enter into alternative contractual arrangements or purchase energy in the forward, short-term, or spot markets at then-current market prices that may exceed the prices previously agreed upon with the defaulting counterparty.

4. Investments

Investments were as follows as of March 31, 2022 and December 31, 2021:

Description	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Carrying Value
			(in thousands)		
March 31, 2022					
Nuclear decommissioning trust ⁽¹⁾					
Debt securities	\$ 85,137	\$ —	\$ (3,285)	\$ 81,852	\$ 81,852
Equity securities	93,280	84,236	(2,926)	174,590	174,590
Cash and other	418	—	—	418	418
Total Nuclear Decommissioning Trust	\$ 178,835	\$ 84,236	\$ (6,211)	\$ 256,860	\$ 256,860

Total Other	\$ 2,333	\$ 2,251	\$ —	\$ 4,584	\$ 2,381
					<u>\$ 264,809</u>
December 31, 2021					
Nuclear decommissioning trust ⁽¹⁾					
Debt securities	\$ 84,701	\$ 4,052	\$ —	\$ 88,753	\$ 88,753
Equity securities	92,916	94,923	(408)	187,431	187,431
Cash and other	474	—	—	474	474
Total Nuclear Decommissioning Trust	\$ 178,091	\$ 98,975	\$ (408)	\$ 276,658	\$ 276,658
Other					
Equity securities	\$ 157	\$ 55	\$ —	\$ 212	\$ 212
Non-marketable equity investments	2,149	2,370	—	4,519	2,149
Total Other	\$ 2,306	\$ 2,425	\$ —	\$ 4,731	\$ 2,361
					<u>\$ 279,019</u>

⁽¹⁾ Investments in the nuclear decommissioning trust are restricted for the use of funding our share of the asset retirement obligations of the future decommissioning of North Anna. See Note 3 of the Notes to Consolidated Financial Statements in our 2021 Annual Report on Form 10-K. Unrealized gains and losses on investments held in the nuclear decommissioning trust are deferred as a regulatory liability or regulatory asset, respectively.

Contractual maturities of debt securities as of March 31, 2022, were as follows:

Description	Less than 1 year	1-5 years	5-10 years	More than 10 years	Total
			(in thousands)		
Other ⁽¹⁾	\$ —	\$ —	\$ 81,852	\$ —	\$ 81,852
Held to maturity	5,568	—	—	—	5,568
Total	<u>\$ 5,568</u>	<u>\$ —</u>	<u>\$ 81,852</u>	<u>\$ —</u>	<u>\$ 87,420</u>

⁽¹⁾ The contractual maturities of other debt securities are measured using the effective duration of the bond fund within the nuclear decommissioning trust.

5. Other

Revolving Credit Facility

We maintain a revolving credit facility to cover our short-term and medium-term funding needs that are not met by cash from operations or other available funds. Commitments under this syndicated credit agreement extend through February 28, 2025. Available funding under this facility totaled \$500 million through March 3, 2022, and totals \$400 million from March 4, 2022 through February 28, 2025. As of March 31, 2022 and December 31, 2021, we had no borrowings and had a \$0.5 million letter of credit outstanding under this facility.

Revenue Recognition

Our operating revenues are derived from sales of power and renewable energy credits to our member distribution cooperatives and non-members. We supply power requirements (energy and demand) to our eleven member distribution cooperatives subject to substantially identical wholesale power contracts with each of them. We bill our member distribution cooperatives monthly and each member distribution cooperative is required to pay us monthly for power furnished under its wholesale power contract. We transfer control of the electricity over time and our member distribution cooperatives simultaneously receive and consume the benefits of the electricity. The amount we invoice our member distribution cooperatives on a monthly basis corresponds directly to the value to the member distribution cooperatives of our performance, which is determined by our formula rate included in the wholesale power contract. We sell excess energy and renewable energy credits to non-members at prevailing market prices as control is transferred.

We sell excess purchased and generated energy to PJM, TEC, or third parties. Sales to TEC consist of sales of excess energy that we do not need to meet the actual needs of our member distribution cooperatives. TEC's sales to third parties are reflected as non-member revenues. For the three months ended March 31, 2022 and 2021, we had no sales to TEC and TEC had no sales to third parties.

Our operating revenues for the three months ended March 31, 2022 and 2021, were as follows:

	Three Months Ended March 31,	
	2022	2021
	(in thousands)	
Revenues from sales to:		
Member distribution cooperatives		
Energy revenues	\$ 115,085	\$ 90,834
Renewable energy credits	17	9
Demand revenues	98,565	93,900
Total revenues from sales to member distribution cooperatives	213,667	184,743
Non-members:		
Energy revenues	3,767	6,191
Renewable energy credits	—	183
Total revenues from sales to non-members	3,767	6,374
Total operating revenues	<u>\$ 217,434</u>	<u>\$ 191,117</u>

6. New Accounting Pronouncements

In March 2020, the FASB issued ASU 2020-04 Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting. The guidance provides temporary optional expedients and exceptions related to contract modifications and hedge accounting to ease entities' financial reporting burdens as the market transitions from the London Interbank Offered Rate and other interbank offered rates to alternative reference rates. The new guidance allows entities to elect not to apply certain modification accounting requirements, if certain criteria are met, to contracts affected by what the guidance calls reference rate reform. An entity that makes this election would consider changes in reference rates and other contract modifications related to reference rate reform to be events that do not require

contract remeasurement at the modification date or reassessment of a previous accounting determination. The ASU notes that changes in contract terms that are made to effect the reference rate reform transition are considered related to the replacement of a reference rate if they are not the result of a business decision that is separate from or in addition to changes to the terms of a contract to effect that transition. The guidance was effective upon issuance and generally can be applied as of March 12, 2020 through December 31, 2022. We are continuing to evaluate the impact of this standard on our financial statements and currently do not anticipate a material impact from adopting this standard.

OLD DOMINION ELECTRIC COOPERATIVE

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Caution Regarding Forward-looking Statements

Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements regarding matters that could have an impact on our business, financial condition, and future operations. These statements, based on our expectations and estimates, are not guarantees of future performance and are subject to risks, uncertainties, and other factors. These risks, uncertainties, and other factors include, but are not limited to: general business conditions; demand for energy; federal and state legislative and regulatory actions, and legal and administrative proceedings; the impact of the ongoing COVID-19 pandemic on our business, financial condition, and future operations; changes in and compliance with environmental laws and regulations; general credit and capital market conditions; weather conditions; the cost and availability of commodities used in our industry; disruption due to cybersecurity threats or incidents; and unanticipated changes in operating expenses and capital expenditures. Our actual results may vary materially from those discussed in the forward-looking statements as a result of these and other factors. Any forward-looking statement speaks only as of the date on which the statement is made, and we undertake no obligation to update any forward-looking statement or statements to reflect events or circumstances after the date on which the statement is made even if new information becomes available or other events occur in the future.

Critical Accounting Policies

As of March 31, 2022, there have been no significant changes in our critical accounting policies as disclosed in our 2021 Annual Report on Form 10-K. These policies include the accounting for regulated operations, deferred energy, margin stabilization, accounting for asset retirement and environmental obligations, and accounting for derivatives and hedging.

Basis of Presentation

The accompanying financial statements reflect the consolidated accounts of ODEC and TEC. See "Note 1—General" in Notes to Condensed Consolidated Financial Statements in Part 1, Item 1.

Overview

We are a not-for-profit power supply cooperative owned entirely by our eleven Class A member distribution cooperatives and a Class B member, TEC. We supply our member distribution cooperatives' energy and demand requirements through a portfolio of resources including generating facilities, long-term and short-term physically-delivered forward power purchase contracts, and spot market purchases. We also supply the transmission services necessary to deliver this power to our member distribution cooperatives.

Our results from operations for the three months ended March 31, 2022, as compared to the same period in 2021, were primarily impacted by the increase in our total energy rate charged to our member distribution cooperatives, the increase in purchased energy costs, and the under-collection of energy costs.

- Total revenues from sales to our member distribution cooperatives increased 15.7%, primarily due to the increase in energy revenues. Energy revenues increased 26.7%, due to the 20.3% increase in our total energy rate charged to our member distribution cooperatives effective January 1, 2022, and the 5.4% increase in energy sales in MWh to our member distribution cooperatives.
- Purchased power expense, which includes the cost of purchased energy and capacity, increased 78.0%, primarily due to the 77.6% increase in purchased energy costs. Purchased energy costs increased as a result of the 79.2% increase in the average cost of purchased energy.

- Deferred energy expense for the three months ended March 31, 2022, was an under-collection of \$41.9 million. As a result of this under-collection, we implemented an energy rate increase of 6.7%, effective May 1, 2022.

Our financial condition as of March 31, 2022, was primarily impacted by the under-collection of energy costs, and the \$69.5 million increase in the fair value of derivatives related to natural gas due to the increase in the price of natural gas. This increase in the fair value of these derivatives was recorded in other assets and regulatory liabilities. Additionally, this increase allowed us to withdraw cash from our NYMEX margin account, which resulted in an increase in cash and cash equivalents and other liabilities.

COVID-19 Pandemic

We believe our results for the three months ended March 31, 2022, were not materially impacted by the COVID-19 pandemic. We continue to monitor how the pandemic could affect our operations, results of operations, financial condition, and cash flows. See “Risk Factors” in Item 1A in our 2021 Annual Report on Form 10-K.

Factors Affecting Results

For a comprehensive discussion of factors affecting results, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting Results” in Item 7 in our 2021 Annual Report on Form 10-K.

Formula Rate

Our power sales are comprised of two power products – energy and demand. Energy is the physical electricity delivered through transmission and distribution facilities to customers. We must have sufficient committed energy available to us for delivery to our member distribution cooperatives to meet their maximum energy needs at any time, with limited exceptions. This committed available energy at any time is referred to as demand.

The rates we charge our member distribution cooperatives for sales of energy and demand are determined by a formula rate accepted by FERC, which is intended to permit collection of revenues which will equal the sum of:

- all of our costs and expenses;
- 20% of our total interest charges (margin requirement); and
- additional equity contributions approved by our board of directors.

The formula rate identifies the cost components that we can collect through rates, but not the actual amounts to be collected. With limited minor exceptions, we can change our rates periodically to match the costs we have incurred and we expect to incur without seeking FERC approval.

Our margin requirement and additional equity contributions approved by our board of directors are recovered through our demand rates. We establish our demand rates to produce a net margin attributable to ODEC equal to 20% of our budgeted total interest charges, plus additional equity contributions approved by our board of directors. The formula rate permits us to adjust revenues from the member distribution cooperatives to equal our actual total demand costs incurred, including a net margin attributable to ODEC equal to 20% of actual interest charges, plus additional equity contributions approved by our board of directors. We make these adjustments utilizing Margin Stabilization.

As detailed in the table below, we utilized Margin Stabilization to reduce revenues for the three months ended March 31, 2022.

	Three Months Ended March 31,	
	2022	2021
	(in thousands)	
Margin Stabilization adjustment	\$ 4,601	\$ 8,754

For further discussion of Margin Stabilization, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies—Margin Stabilization” in Item 7 in our 2021 Annual Report on Form 10-K.

Weather

Weather affects the demand for electricity. Relatively higher or lower temperatures tend to increase the demand for energy to use air conditioning and heating systems, respectively. Mild weather generally reduces the demand because heating and air conditioning systems are operated less. Weather also plays a role in the price of energy through its effects on the market price for fuel, particularly natural gas.

Heating and cooling degree days are measurement tools used to quantify the need to utilize heating or cooling, respectively, for a building. Heating degree days are calculated as the number of degrees below 60 degrees in a single day. Cooling degree days are calculated as the number of degrees above 65 degrees in a single day. In a single calendar day, it is possible to have multiple heating degree and cooling degree days.

The heating and cooling degree days for the three months ended March 31, 2022, were as follows:

	Three Months Ended March 31,		
	2022	2021	Change
Heating degree days	1,937	1,958	(1.1)%
Cooling degree days	—	—	—

Power Supply Resources

We provide power to our members through a combination of our interests in Wildcat Point, a natural gas-fired combined cycle generation facility; North Anna, a nuclear power station; Clover, a coal-fired generation facility; two natural gas-fired combustion turbine facilities (Louisa and Marsh Run); diesel-fired distributed generation facilities; and physically-delivered forward power purchase contracts and spot market energy purchases. Our energy supply resources for the three months ended March 31, 2022 and 2021, were as follows:

	Three Months Ended March 31,			
	2022		2021	
	(in MWh and percentages)			
Generated:				
Wildcat Point	838,368	24.6%	534,036	16.1%
North Anna	419,164	12.3	436,693	13.2
Clover	140,726	4.1	185,594	5.6
Louisa	14,655	0.5	71,077	2.1
Marsh Run	31,065	0.9	104,727	3.2
Distributed Generation	327	—	451	—
Total Generated	1,444,305	42.4	1,332,578	40.2
Purchased:				
Other than renewable:				
Long-term and short-term	850,001	24.9	935,169	28.2
Spot market	886,645	26.0	810,898	24.5
Total Other than renewable	1,736,646	50.9	1,746,067	52.7
Renewable ⁽¹⁾	228,734	6.7	237,028	7.1
Total Purchased	1,965,380	57.6	1,983,095	59.8
Total Available Energy	3,409,685	100.0%	3,315,673	100.0%

- (1) Related to our contracts from renewable facilities from which we obtain renewable energy credits. We may sell these renewable energy credits to our member distribution cooperatives and non-members.

Generating Facilities

Our operating expenses, and consequently our rates charged to our member distribution cooperatives, are significantly affected by the operations of our generating facilities, which are under dispatch direction of PJM. For further discussion of PJM, see “Business—Power Supply Resources—PJM” in Item 1 in our 2021 Annual Report on Form 10-K.

Operational Availability

The operational availability of our owned generating resources for the three months ended March 31, 2022 and 2021, was as follows:

	Three Months Ended March 31,	
	2022	2021
Wildcat Point	98.3%	99.5%
North Anna	85.6	90.0
Clover	66.5	83.9
Louisa	99.9	98.7
Marsh Run	99.9	99.6

Capacity Factor

The output of Wildcat Point, North Anna, and Clover for the three months ended March 31, 2022 and 2021, as a percentage of maximum dependable capacity rating of the facilities, was as follows:

	Three Months Ended March 31,	
	2022	2021
Wildcat Point	39.5%	25.0%
North Anna	88.4	92.2
Clover	15.3	20.1

Results of Operations

Operating Revenues

Our operating revenues are derived from sales of power and renewable energy credits to our member distribution cooperatives and non-members. Our operating revenues and energy sales in MWh by type of purchaser for the three months ended March 31, 2022 and 2021, were as follows:

	Three Months Ended March 31,	
	2022	2021
(in thousands)		
Revenues from sales to:		
Member distribution cooperatives		
Energy revenues	\$ 115,085	\$ 90,834
Renewable energy credits	17	9
Demand revenues	98,565	93,900
Total revenues from sales to member distribution cooperatives	213,667	184,743
Non-members:		
Energy revenues	3,767	6,191
Renewable energy credits	—	183
Total revenues from sales to non-members	3,767	6,374
Total operating revenues	\$ 217,434	\$ 191,117
Energy sales to:		
(in MWh)		
Member distribution cooperatives	3,305,268	3,136,512
Non-members	89,405	161,000
Total energy sales	3,394,673	3,297,512
Average cost of energy to member distribution cooperatives (per MWh)	\$ 34.82	\$ 28.96
Average total cost to member distribution cooperatives (per MWh)	\$ 64.64	\$ 58.90

Member Distribution Cooperatives

For the three months ended March 31, 2022, total revenues from sales to our member distribution cooperatives increased \$28.9 million, or 15.7%, as compared to the same period in 2021. Energy revenues increased \$24.3 million, or 26.7%, due to the 20.3% increase in our total energy rate, effective January 1, 2022, and the 5.4% increase in energy sales in MWh. Demand revenues increased \$4.7 million, or 5.0%, substantially due to the increase in transmission costs and capacity-related purchased power expense.

The following table summarizes the changes to our total energy rate since 2021, which were implemented to address the differences in our realized as well as projected energy costs:

Date	% Change
January 1, 2021	(15.9)
January 1, 2022	20.3
May 1, 2022	6.7

Operating Expenses

The following is a summary of the components of our operating expenses for the three months ended March 31, 2022 and 2021:

	Three Months Ended March 31,	
	2022	2021
	(in thousands)	
Fuel	\$ 33,021	\$ 39,754
Purchased power	126,363	70,992
Transmission	34,284	31,626
Deferred energy	(41,871)	(15,940)
Operations and maintenance	18,609	16,436
Administrative and general	10,728	10,880
Depreciation and amortization	17,287	17,676
Amortization of regulatory asset/(liability), net	(200)	2,487
Accretion of asset retirement obligations	1,467	1,415
Taxes, other than income taxes	2,308	2,425
Total Operating Expenses	\$ 201,996	\$ 177,751

Our operating expenses are comprised of the costs that we incur to generate and purchase power to meet the needs of our member distribution cooperatives, and the costs associated with any sales of power to non-members. Our energy costs generally are variable and include fuel expense, the energy portion of our purchased power expense, and the variable portion of operations and maintenance expense. Our demand costs generally are fixed and include the capacity portion of our purchased power expense, transmission expense, the fixed portion of operations and maintenance expense, administrative and general expense, and depreciation and amortization expense. Additionally, all non-operating expenses and income items, including investment income and interest charges, net, are components of our demand costs. See “Factors Affecting Results—Formula Rate” above.

Total operating expenses increased \$24.2 million, or 13.6%, for the three months ended March 31, 2022, as compared to the same period in 2021, primarily as a result of the increase in purchased power expense, partially offset by the decrease in deferred energy expense and fuel expense.

- Purchased power expense, which includes the cost of purchased energy and capacity, increased \$55.4 million, or 78.0%, primarily due to the \$53.1 million, or 77.6%, increase in purchased energy costs. Purchased energy costs increased as a result of the 79.2% increase in the average cost of purchased energy.
- Deferred energy expense, which represents the difference between energy revenues and energy expenses, decreased \$25.9 million. For the three months ended March 31, 2022 and 2021, we under-collected \$41.9 million and \$15.9 million, respectively. For further discussion on deferred energy, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies—Deferred Energy” in Item 7 in our 2021 Annual Report on Form 10-K.
- Fuel expense, which includes gains on our natural gas futures contracts, decreased \$6.7 million, or 16.9%, primarily due to the 23.4% decrease in the average cost of fuel, partially offset by the 8.4% increase in generation from our owned facilities.

Other Items

Interest Charges, Net

The primary factors affecting our interest charges, net are issuances of indebtedness, scheduled payments of principal on our indebtedness, interest charges related to our revolving credit facility (including fees), and capitalized interest. The major components of interest charges, net for the three months ended March 31, 2022 and 2021, were as follows:

	Three Months Ended March 31,	
	2022	2021
	(in thousands)	
Interest on long-term debt	\$ (13,339)	\$ (13,973)
Interest on revolving credit facility	(104)	(95)
Other interest	(258)	(130)
Total interest charges	(13,701)	(14,198)
Allowance for borrowed funds used during construction	292	188
Interest charges, net	<u>\$ (13,409)</u>	<u>\$ (14,010)</u>

Net Margin Attributable to ODEC

Net margin attributable to ODEC, which is a function of our total interest charges plus any additional equity contributions approved by our board of directors, was relatively flat for the three months ended March 31, 2022, as compared to the same period in 2021.

Financial Condition

The principal changes in our financial condition from December 31, 2021 to March 31, 2022, were caused by increases in other assets, other liabilities, regulatory liabilities, and deferred energy; and decreases in accounts payable—members and nuclear decommissioning trust.

- Other assets increased \$73.5 million primarily due to the increase in the fair value of derivatives related to natural gas, slightly offset by the \$6.5 million decrease in the fair value of financial transmission rights.
- Other liabilities increased \$54.3 million primarily due to the cash withdrawal from our NYMEX margin account due to the increase in the fair value of derivatives related to natural gas.
- Regulatory liabilities increased \$53.6 million due to the \$75.0 million increase of deferred gains on derivatives, partially offset by the \$20.5 million unrealized loss on the North Anna nuclear decommissioning fund.
- Deferred energy increased \$41.9 million as a result of the under-collection of our energy costs in 2022.
- Accounts payable—members decreased \$32.6 million due to the \$16.9 million decrease in member prepayments, the payment of the \$8.7 million patronage capital retirement, and the \$7.0 million decrease in the amounts owed to our member distribution cooperatives under Margin Stabilization.
- Nuclear decommissioning trust decreased \$19.8 million due to the decrease in the market value of our investments.

Liquidity and Capital Resources

Sources

Cash generated by our operations, periodic borrowings under our revolving credit facility, and occasional issuances of long-term debt provide our sources of liquidity and capital.

Operations

During the first three months of 2022 and 2021, our operating activities provided cash flows of \$21.4 million and \$56.1 million, respectively.

Revolving Credit Facility

We maintain a revolving credit facility to cover our short-term and medium-term funding needs that are not met by cash from operations or other available funds. Commitments under this syndicated credit agreement extend through February 28, 2025. Available funding under this facility totaled \$500 million through March 3, 2022, and totals \$400 million from March 4, 2022 through February 28, 2025. As of March 31, 2022 and December 31, 2021, we had no borrowings and had a \$0.5 million letter of credit outstanding under this facility.

Financings

We fund the portion of our capital expenditures that we are not able to fund from operations through borrowings under our revolving credit facility and issuances of debt in the capital markets. These capital expenditures consist primarily of the costs related to the development, construction, acquisition, or improvement of our owned generating facilities. We currently have no plans to construct a major new generating facility or issue any additional long-term indebtedness in the near term. We believe our cash from operations and funds available from our revolving credit facility will be sufficient to meet our currently anticipated future operational and capital requirements.

Uses

Our uses of liquidity and capital relate to funding our working capital needs, investment activities, and financing activities. Substantially all of our investment activities relate to capital expenditures in connection with our generating facilities. Additionally, we have asset retirement obligations in the future that are significantly offset by the nuclear decommissioning trust, which as of March 31, 2022, had a balance of \$256.9 million. Our future contingent obligations primarily relate to power purchase and natural gas arrangements, and we have no off-balance sheet obligations. Some of our power purchase contracts obligate us to provide credit support if our obligations issued under the Indenture are rated below specified thresholds by S&P and Moody's. We currently anticipate that cash from operations and borrowings under our revolving credit facility will be sufficient to meet our liquidity needs for the near term, including planned capital expenditures, decommissioning trust obligations, and our contingent obligations as described above.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

No material changes occurred in our exposure to market risk during the first quarter of 2022.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, our management, including the President and Chief Executive Officer, and Senior Vice President and Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures. Based upon that evaluation, the President and Chief Executive Officer, and Senior Vice President and Chief Financial Officer, concluded that our disclosure controls and procedures are effective in ensuring that all material information required to be filed in this report has been made known to them in a timely manner. We have established a Disclosure Assessment Committee comprised of members of our senior and middle management to assist in this evaluation.

There have been no material changes in our internal control over financial reporting or in other factors that could significantly affect such controls during the past fiscal quarter.

OLD DOMINION ELECTRIC COOPERATIVE

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Recovery of Costs from PJM

In the first quarter of 2014, we incurred approximately \$14.9 million of costs related to the dispatch of our combustion turbine facilities for which we were directed by PJM to incur and were subsequently denied reimbursement. Our pursuit of recovery of these costs from PJM before FERC was unsuccessful.

We pursued recovery as a separate breach of an oral contract claim in the Circuit Court for the County of Henrico in the Commonwealth of Virginia. In 2019, PJM removed the matter to United States District Court for the Eastern District of Virginia and filed a motion to dismiss, and we filed a motion to remand the matter to state court. In 2020, the court granted PJM's motion to dismiss and denied our motion to remand the matter to state court. We filed a notice of appeal to the United States Court of Appeals for the Fourth Circuit, oral arguments were held on October 28, 2021, and on January 19, 2022, the court affirmed the denial of our motion to remand the matter back to state court and dismissed the case. On April 18, 2022, we filed a writ of certiorari with the United States Supreme Court. We cannot predict the outcome of this matter and did not record a receivable related to this matter.

Other Matters

Other than the dispute discussed above and certain other legal proceedings arising out of the ordinary course of business that management believes will not have a material adverse impact on our results of operations or financial condition, there is no other litigation pending or threatened against us.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in "Risk Factors" in Part I, Item 1A in our 2021 Annual Report on Form 10-K, which could affect our business, results of operations, financial condition, and cash flows. The risks described in our Annual Report on Form 10-K are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, results of operations, financial condition, and cash flows.

ITEM 5. OTHER INFORMATION

On May 10, 2022, our board of directors elected Mr. William K. Buchanan as a member of the board of directors, effective May 10, 2022. Mr. Buchanan was recommended to the Nominating Committee by BARC Electric Cooperative to replace Mr. Christopher S. Botulinski. Mr. Buchanan will serve on the Finance, Rate Design, Strategic Electrification, and Strategic Planning Committees.

OLD DOMINION ELECTRIC COOPERATIVE
CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Old Dominion Electric Cooperative (the “Company”) on Form 10-Q for the period ending March 31, 2022 as filed with the Securities and Exchange Commission on the date hereof (the “Report”), I, Marcus M. Harris, President and Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and result of operations of the Company.
